**Nomura World Indices Autocallable Notes****Key Features**

The Nomura World Indices Autocallable Notes ("the Notes") provide investors **potential returns of 13.75% p.a. equivalent in EUR, GBP or USD** combined with 4 opportunities for early redemption.

The Notes are issued by Nomura Bank International plc ("the Issuer"), which is rated by S&P as A-, at the time of publication.

The Notes are issued in **EUR, GBP and USD**, have an investment term of **5 years**, and are intended to be held for the entire period.

The Notes provide exposure to 3 key markets indices:

- **FTSE 100 Index (UKX Index)**
- **S&P 500 Index (SPX Index)**
- **Dow Jones Eurostoxx 50 Index (SX5E Index)**

**Overview of the Structure**

A 5 year investment linked to the performance of the FTSE 100 Index, the S&P 500 Index and the DJ Eurostoxx 50 Index.

If on any annual Observation Date all the Indices are above their Initial Level, the Notes will auto-redeem and the investor shall receive:

- **13.75% for each year the Notes have been active**
- **i.e. If the Notes autoredeem at the end of year 3, the investor will receive (13.75% x 3) + 100% initial capital = 141.25%**

**Capital is at risk with this product:**

A fall of 50% or more in Performance is required in any Index before Capital may be at risk. The Performance is measured by comparing the Initial Level vs. the closing level on each day. If any Performance measures a fall of 50% or more then investors receive the Performance of the Worst Performing Index at maturity.

**Risks**

Please bear in mind that investors are exposed to the credit risk of the Issuer. The Notes are not capital protected and investors may receive back less than the original amount invested. The value of the investment can go down as well as up and investors can potentially lose all of their investment. Any secondary market provided by Nomura International plc is subject to change and may be stopped without notice and investors may therefore be unable to sell or redeem the Notes until their maturity. If the Notes are redeemed early they may be redeemed at a level less than the amount originally invested.
